## Example of a fact and opinion

Facts and opinions have different meanings and definitions but sometimes it can be difficult to tell which are facts and opinions. A fact is a situation or event that is a fact or something that actually happened. While opinion is an opinion or opinion that has not been recognized as true. To better know which are facts and which are opinions, let's look at examples of facts and opinions so that we can clearly know the facts and opinions as follows. Understanding Facts Quick Readshow 1. Understanding Facts 1.1. Fact Traits 1.2. Kinds of Facts 2. Example Facts 3. Definition of Opinion 3.1. Opinion Characteristics 3.2. Types of Opinion 4. Sample Opinion 4.1. How to Distinguish Fact and Opinion Sentences. 4.2. How to Teach Facts and Opinion Sentences in Elementary School 5. Difference between Facts and Opinions 5.1. Conclusion: 5.2. Share this: Fact sentences are sentences that put forward real facts and findings, and often using quotes from various sources to strengthen the argument, for example based on the writings of Leonardo Da Vinci. "quoting Shakespeare", according to a survey conducted by LSI. Facts come from the Latin word factus which can be interpreted as things or events that really exist or occur and can be proven true. The information heard can be called a fact if the event is an event in the form of a reality that really exists and occurs. Also Read: Understanding Facts and Opinions Based on the Big Indonesian Dictionary: facts are things (conditions, events) which are reality; something that actually exists or happens. Sentences that contain the perpetrator, the place of the incident, the time, the amount, how the incident / event occurs, or there are clear details, and the truth cannot be denied, then the sentence is in the form of fact sentence. So in the conclusion that the sentence of fact is an event that really happened and can be proven true. Facts are things or events that actually happened (Suyono, 2004: 8). Fact is something that can be seen, touched, and felt by everyone (Abdullah, 1999: 14). Facts are things (conditions, events) that are reality, something that really exists or happens (KBBI, 2008: 387). Based on these opinions, the writer refers to Suyono's opinion which states that facts are things or events that actually happened. Fact Traits The accuracy of a fact does not always guarantee the accuracy of the meaning. Accurate facts are selected or loosely arranged. By putting too much or too little emphasis on, by inserting facts that are not relevant or by omitting facts that should be there, the reader may get the wrong impression false. The characteristics of opinion sentences are as follows: It can be proven true. Have accurate data such as date, time, time of occurrence. Have reliable sources. It is objective (as it is and not made up) which is equipped with data in the form of information or numbers that describe the situation. It's been confirmed. Usually can answer the questions: what, who, where, when, how much with certainty. Shows what happened. Reality Information from actual events. Sentences are sentences that put forward real facts and findings, and often use quotes from various sources to strengthen arguments. Also Read: Business Communication - Materials, Elements, Processes, Functions, Benefits, Forms and Examples Types Fact Facts that apply throughout the ages. For example, the sun rises in the east and sets in the west. A fact that holds true at one or more times. For example, a driver driving a car Example Facts The tiger is a four-legged animal. Indonesia is an archipelagic country, consisting of 5 large islands, namely Sumatra, Kalimantan, Sulawesi, Irian Jaya and Java. Sugar can make drinks sweet. The pencil costs two thousand rupiah. Oxygen is needed by humans. The Republic of Indonesia became independent on August 17, 1945. Indonesian is the language of unity and the legal language used in everyday life. The sun comes out in the east and sets in the west. Chickens and birds belong to the category of animals that reproduce by laying eggs. In the body of the hedgehog there are thorns which are tools to protect himself from attacks by other fauna. Definition of Opinion Opinion is one of the words that almost always coexists with the word and the two have a very clear difference. Opinion is an opinion, idea or thought to explain a certain tendency or preference towards perspectives and ideologies but are not objective because they have not received confirmation or testing. Although it is not a fact but if one day an opinion can be proven then the opinion will turn into a fact. Opinions are everything that a person expresses based on the stance or attitude he believes in (Suyono, 2004: 8). Opinion means an opinion or view about something. Also Read: The title of the plan is Therefore, opinion is subjective because the views or judgments of someone with the cloth are always different. So, even though the facts are the same, when people have opinions, one person to another shows a difference (Abdullah, 1999: 14). Based on these notions of opinion, the opinion sentence is a statement whose contents are in the form of an opinion or opinion of a person/group. The truth is very likely to occur because it is influenced by subjective personal elements. Opinion Characteristics According to Suyono (2007: 158) the characteristics of opinion are detailed as follows: in terms of content, opinions are appropriate or not in accordance with reality depending on certain interests, in terms of truth, opinions can be right or wrong depending on supporting data or context, in terms of expressing opinions tend to be argumentative and persuasive, in terms of reasoning opinions tend to be deductive. Information is considered an opinion if it has the following characteristics: Cannot be proven true. It is subjective and comes with a description of opinions, suggestions, or predictions about the causes and occurrence of events. Not against the source / on his own thoughts Does not have accurate data Contains responses to events that occur, contains answers to questions: why, how, or then what. Shows events that have not or will occur in the future (new in the form of plans). Opinion sentences are uncertain and usually begin with words such as, I think, I think, I think. A person's opinion or argument is information that has not been verified. Types of Opinion Opinions expressed by someone openly in front of others who are in a group, both formal / informal. Example: according to the ali, Indonesia's population in 2010 will reach 300 million people. An opinion expressed by a person to another person who has a close relationship with him or is trusted. Personal opinion/opinion contains an element of intimidation/familiarity. Unity of opinion that arises from a group of people who gather spontaneously and discuss controversial issues. Public opinion is the result of social interaction, discussion or judgment between these individuals based on a conscious and rational exchange of thoughts expressed both orally and in writing. The issue or problem being discussed is the result of what is reported by the mass media (both print and electronic media). Also Read: Editorial Text The functions of public opinion are as follows: Public opinion serves to provide understanding, so that with this understanding one can objectively respond to problems or problems that are pervasive in society. This function is important because individuals as human beings are often overwhelmed and controlled by the nature of suspicion and the nature of directly giving a verdict before understanding whether or not a problem is true. Public opinion serves to introduce opinions which are group agreements to the individual members. This is treated because it also tends to act in the same way as it does to help resolve tensions individuals who are members of a group, among others, by dividing tasks among fellow members group. Opinion generated by a public opinion gathering body on an issue. Opinions that have settled in society have been influenced by various cultural norms and are static. Example: smoking excessive cigarettes will harm yourself. Sample Opinion Tomorrow I will go abroad. The house is huge. Indonesia is a beautiful country. The car is very fast. Mother's food is the best. It looks like later in the evening it will rain heavily accompanied by strong winds. The food will taste more savory if you add not a lot of orange juice. Roses are very beautiful flowers compared to other flowers. Mathematics and English are subjects that are hated by all school students. A house that has been empty for a long time is believed to be haunted. How to Distinguish Fact and Opinion Sentences. Fact sentences are usually followed by data that supports the sentence. Sentences that are objective are facts while those that are subjective The truth that is certainly true is a sentence of fact, while the truth that still leaves debate in society is in the form of an opinion sentence. Opinion sentences are based on thoughts, possibilities and feelings, while fact sentences are based on data. Opinion sentences often use words such as very, more, could, maybe, otherwise, perhaps, according to, and so on. In opinion sentences, there are also many adjectives such as delicious, beautiful, tall and others. Also Read: Ad Text How to Teach Facts and Opinion Sentences in Elementary School Teachers should hold a lot of classical discussions in learning facts and opinion sentences. So that students will be encouraged to express their ideas and opinions. In addition, the difference between fact and opinion sentences, for example: The truth is objective, it is a fact that actually happened, there are data accurate as a supporter while the opinion sentence is the truth is subjective, showing events that have not yet occurred, the absence of which supporters. The teacher must give students the opportunity to present their work / work about sentences of facts and opinions along with examples that exist in everyday life. The teacher facilitates students in group learning activities about the characteristics, differences, how to distinguish between facts and opinions. Teachers in delivering learning lectures must pay attention to speech techniques, eye contact techniques, facial expressions, to the choice of words in the delivery of material points of facts and opinions that be delivered. This is important so that students are always enthusiastic to pay attention when the teacher is lecturing. Difference between Facts and Opinions We can actually distinguish between facts and opinions. Differences in facts and opinions can be seen from their understanding, it's good to know the differences in facts and opinions, we observe the meaning of the two, then conclude where the difference lies then because if you want to distinguish something, you want to know the difference, we look carefully at what we want to understand differentiate. To find out more clearly about the difference between fact and opinion, let's look at the explanation below. Facts are what they are. In other words, facts are portraits of circumstances or events. Therefore, the facts are difficult to refute because they can be seen or known by many parties. However, the facts may change if new, clear and accurate facts are found. Opinions are not true. Personal opinion can be wrong or right, right? One's opinion can also differ from the opinion of another. An opinion will be closer to the truth if it is supported by strong and convincing facts. Conclusion: From the above review it can be concluded that the facts serve as the basis for an opinion. One should state the facts first, and then argue. On the other hand, facts can also serve to clarify an opinion, in which case one should make an opinion first and then reconcile it with the facts. That's the discussion about 20 Examples of Facts and Opinions: Definition, Characteristics, Types, Differences and Ways I hope this review can add to your insight and knowledge, thank you very much for visiting. Female working in florist shop: The importance to differentiate between fact and opinion is, for instance, I've just received a promotional e-mail about the hottest digital camcorder.How do I know how good it is?It can be absolute rubbish.It uses the word hottest, which is opinion, not fact.Female with shoulder length brown hair, wearing red top: Nowadays, you get a lot of words thrown at you, a lot of information thrown at you, which is actually trying to sell you something, and you need to be able to, you know, realise that actually this is something they're trying to sell me.It's not actually information.Male working at Oldham Council: This diagram here illustrates the facts of where Oldham's money comes from.Oldham Council's net budget requirement for 2010/11 was £234 million.We know that's a fact, which can be substantiated. fact vs opinion with sentence examples Used under Getty Images license What's the difference between a fact and an opinion? Some people may think they are quite similar, but actually, a fact and an opinion are very different ideas. Keep reading for fact vs. opinion examples that should help you understand which is which. A fact is an objective piece of information that can be proven true or false. It can be verified with more than one piece of reliable evidence. You'll find facts in science, math, history, and everyday life. Here are some verifiable facts that are not up for debate because they can be proven with evidence. There's an easy way to prove this fact right: if you hold your breath, what happens? When you can't breathe, your heart has no oxygenated blood to pump, and your brain cells begin to die. Depriving a living thing of oxygen results in its death. You can prove that the capital of Mexico is Mexico City by consulting any number of resources, including maps, encyclopedias and Mexican officials themselves. While it wasn't always called Mexico City (it was once the Aztec capital of Tenochtitlán), it is currently the country's capital. Verifying that people keep dogs as pets is as simple as looking around your neighborhood — or maybe even your own house! There's nothing opinionated about the fact that some people have pet dogs. Look at your nearest calendar. What's marked for February 14th? Valentine's Day, the holiday that celebrates love and romance, is likely written into that square. If verifying the information on your calendar isn't enough, try looking up the history of the holiday. Our understanding that ocean covers over 70% of Earth's surface isn't just a guess or hypothesis. It's compiled from the studies of explorers, cartographers, geographers, geologists, marine biologists, and more scientists over many millennia. We can state this finding as a fact because it has been proven over and over again. History can be a tricky subject because it's difficult to find purely objective facts. As they say, history is written by the winners. However, it's difficult to argue with recorded historical events such as the surrender of Confederate General Robert E. Lee on April 9, 1865. No matter what your opinions are about the American Civil War, it's easy to prove that this event happened, making the Union Army victorious. If you doubt a scientific fact, the scientific method is here to prove it for you. Enough scientists have tested the temperature at which water freezes, and have determined that the answer is 0 degrees Celsius (or 32 degrees Fahrenheit). If you have any doubt, look outside during winter when it gets that cold. You're likely to see some frozen water! Voting rights are another area where people have a lot of opinions. But no one can argue with the existence of the 19th Amendment in the United States Constitution. It was ratified in 1920, giving women the right to vote. Unlike facts, opinions can't be verified. They can be supported by evidence as in persuasive writing, but don't need to be. Anyone can have any opinion about anything because it doesn't need to be based in reality. Take the facts listed above and see how they are different as opinion statements. You could argue that because we need oxygen to survive (a fact), that it's the most important element. But that's your opinion. Someone else could argue that carbon is the most important element because organic compounds would not exist without it. Others might claim that hydrogen is just as important as oxygen. You can support all these opinions with evidence, but that doesn't make them facts. Saying that something is "the best" is always an opinion statement — even when you're sure most people would agree with you. Mexico City is the capital of Mexico and that's a fact, but deciding whether it's the best city in Mexico is a matter of opinion. This is a popular opinion, but that doesn't mean it's a fact. Some may argue that dogs are terrible pets based on their personal experience. Others may claim that dogs are fine, but cats are better. Again, there's no way to validate this opinion. The date of Valentine's Day is a fact, but how you feel about it is an opinion. People use anecdotes and personal stories to form opinions such as whether a holiday is the "best" or "worst" holiday. This opinion would make a great topic for an argument essay, but in the end, it's someone's personal opinion. They can use lots of evidence to back up this idea, including the value of desalinating water to make it suitable for drinking. However, it's still not a verifiable fact. The result of the Civil War was a Union victory — but did they fight better than the Confederacy? Many might say that the proof is in the results, as the Union did win. Others may claim that the Confederacy won more battles and gained more land in the first few years of the war, and therefore fought more effectively. It depends on your perspective, what evidence you're using and what you're trying to argue. How cold is too cold? The answer will vary because everyone grows up with different experiences. People who live in warmer areas may believe that 0 degrees Celsius is simply too cold, while those who live in snowy or freezing climates may think that 0 degrees is perfectly enjoyable. You can't argue that water freezes at 0 degrees, because it does, but you can absolutely argue whether you like that weather or not. Sometimes an opinion is so popular that people confuse it for fact. However, believing that women should be allowed to vote is just that: a belief and an opinion. Backing up these opinions through legislature and Constitutional amendments ensures that a country's values are protected against changing minds or movements. Now that you know the difference between facts and opinions, how can you easily tell which is which? Keep an eye out for these fact and opinion signal words, which can quickly tell you what type of statement you are reading or hearing. Fact Signal WordsOpinion Signal Wordsverifiedthink, feel, believepeer-reviewedclaim, arguestatisticsalways, neverprovengood, better, bestconfirmedgood, better, bestdiscoveredshould, should notdemonstratedin my point of viewevidencein my experience It gets tricky when people use fact signal words to pretend that their opinions are facts. That's when common sense comes in. If you can't prove or verify a statement, it can't be a fact. The next time you're reading an article or watching the news, you'll be more prepared to tell whether you're hearing a fact or opinion. But don't let your own confirmation bias convince you that a convenient opinion is a proven fact. Use these fact and opinion worksheets to challenge yourself or your students when it comes to telling fact from opinion. Facts and opinions are often uttered in the same breath; the terms have a huge difference in their meanings. Whether a statement is a fact or an opinion depends on the validity of the statement. While a fact refers to the something true or real, which is backed by evidence, documentation, etc. On the other hand, opinion is what a person believes or thinks about something. In finer terms, a fact is a proven truth, whereas opinion is a personal view, that represents the outlook of an individual, which may or may not be based on the fact. In this article excerpt, an attempt is made to simplify the difference between fact and opinion, take a read. Content: Fact Vs Opinion Comparison Chart Definition Key Differences Conclusion Comparison Chart Basis for ComparisonFactOpinion MeaningFact refers to something that can be verified or proved to be true.Opinion refers to a judgement or belief about something. Based onObservation or research.Assumption or personal view. What is it? Objective realitySubjective statement VerificationPossibleNot possible RepresentsSomething really happenedA perception about something ChangeUniversalDiffers from person to person WordsShown with unbiased words.Expressed with biased words. DebatableNoYes InfluenceFacts has the power to influence others.Opinion does not have the power to influence others. Definition of FactThe fact is something, that has actually taken place or known to have existed, which can be validated with pieces of evidence. They are strictly defined, and can be measured, observed and proven. It refers to something that makes statements true and used in connection with research and study. A fact can be an event or information, based on real occurrences which can be tested through verifiability, i.e. they are supported by proofs, statistics, documentation, etc. Therefore, a fact is nothing but a verifiable truth or reality which are agreed upon by consensus of people. Definition of OpinionThe term 'opinion' is defined as the personal view or judgment about a subject, that may or may not be substantiated by the facts or positive knowledge. In other words, an opinion is an inconclusive statement, used in subjective matters, which cannot be proved true or false. It is what a person thinks or feels about something or someone. Hence it is not a true but biased information. Opinion is highly influenced by a person's feelings, thoughts, perspective, desires, attitude, experiences, understanding, beliefs, values, etc., which cannot be tested by concrete evidence. Therefore, due to individual differences, every person's opinion on a particular matter is also different. The difference between fact and opinion on the following grounds: The fact is described as the statement that can be verified or proved to be true. Opinion is an expression of judgment or belief about something. Fact relies on observation or research while opinion is based on assumption. The fact is an objective reality whereas opinion is a subjective statement. Facts can be verified with the help of evidence or statistics. On the contrary, opinion is not supported by any evidence. Facts explain what actually happened. Unlike an opinion, that represents a perception about something. One important feature of the fact is that it is universal and does not differ from person to person. As against this, every human being has a different opinion on a particular subject and so, it varies from one person to another. Facts are shown with unbiased words, however, opinion is expressed with biased words. Facts can change anybody's opinion, but vice versa is not possible. Facts are real information and so it cannot be challenged or debated, but if we talk about opinions, they can be debated. Conclusion Therefore, to know the reliability and utility of an information or statement, it is vital to understand the differences between fact and opinion, so as to evaluate things and draw conclusions. While reading comprehension, it is hard to identify, whether a given expression is a fact or an opinion, as they are quite commonly juxtaposed by the writers. Facts are always one step ahead of opinions as facts can be proved to be right or accurate, whereas opinion may also be right but they cannot be proved as true. FS Level 1FS Level 2AQACity & GuildsEdexcelHighfield QualificationsNCFEOpen Awards A fact is a statement that can be proved, for example a statistic based on research. It is something which is objectively true. Sometimes it can be easier to spot a fact if it is introduced by a phrase such as: 'Research has shown that...' OR 'Scientists say that...' Because of this, facts are usually found in explanatory and informative texts. FS Level 1FS Level 2AQAEexcelCity & GuildsNCFEOpen AwardsHighfield Qualifications An opinion is a statement or belief that can't be proved - it is neither true nor false. Sometimes it can be easier to spot an opinion if it is introduced by a phrase such as: 'I think that...' OR 'I believe...' However, opinions will not always be introduced by phrases like the above, so make sure that you check whether a statement can be proven!
