Click on image to zoom The Anderic FAN2R/UC7078T Kit for Hampton Bay and Hunter Ceiling Fans is the perfect solution for fixing your ceiling fan's control system. Specifically designed to replace the original Hampton Bay FAN-2R receiver and UC7078T remote with reverse functionality, this kit offers seamless compatibility and enhanced convenience.This kit works:- Downward-facing light- Light Dimming- Fan speeds: Low, Medium, High, & Off- Forward & ReverseComprehensive Kit:This kit includes everything you need for a straightforward installation. It consists of the FAN2R receiver unit with a 9-prong plug that directly connects to your ceiling fan and the Anderic RR7078TR With Reverse remote control. A wall mount clip is also included for added convenience, providing a handy storage solution for the remote.Durable Design and Specifications:The FAN2R receiver boasts a compact design, measuring 4.25" in diameter and 1.75" in thickness. The RR7078TR remote is ergonomically designed, measuring 5.5" in length, 2" in width, and 1" in thickness, ensuring comfortable handling and intuitive button placement. Both components are built to last, ensuring long-lasting performance and reliable operation.Important Note:Please note that this kit is specifically designed to replace the receiver and remote originally installed in your fan. It is not compatible with fans that do not already have the required receiver pre-installed. If your fan includes the Home Decorators Collection MR77A Receiver, a slight modification is required, which involves removing the old bracket from the light housing. Detailed installation instructions can be found in the Downloads area. Additionally, this kit serves as a replacement for the Hunter 8511204 receiver, as the old Hunter remote will not function with this receiver. Includes:FAN2R receiver unit with a 9-prong plug that plugs directly with the fanAnderic RR7078TR With Reverse Remote controlWall mount clip for remoteInstructionsSpecifications: Receiver - 4.25" Diameter, 1.75" ThickRemote - 5.5" Long, 2" Wide, 1" ThickPlease note:If you have the HUNTER UC7848T Remote, please locate your receiver in the fan before ordering and make sure your part has a corresponding 9 PIN plug.For some Hunter Fans, you may have to buy the corresponding Molex to amp adaptor harness.This kit WILL replace the original Home Decorators Collection MR77A Receiver with slight modification (removing the old bracket from the light housing). See Instructions on installation in the Downloads area. Product help/documentation (if applicable): Installation InstructionsSupplied with models (if applicable): Compatible with models (if applicable): Part Number: FAN2R-RR7078TR-KITModel Number: FAN2R/RR7078TR for Hampton Bay / HUNTERBattery Required (not included): 9 Volt BatteryPower Source: Battery-poweredPackage Size (Inches): // FCC ID (if applicable): Frequency (if applicable): 0.00.0When programming to the Anderic RRU401 4-Device Universal Remote Control, use code: Informative Website, Rapid Delivery This fan wall controller was functionally a perfect substitute for the Craftsman UC7077T that is no longer made. I had tried two other products that didnt work, one that I bought from a website that claimed to be a UC7077T and wasnt, and the Craftsman advertised replacement for UC7077T, neither worked for my fan/light, which uses a dip switch. Also the product was shipped promptly by Anderic. Harbor Breeze fan and light Was very easy to pair with fan works great Great company to deal with and awesome remote Received the wrong remote in a shipping error, and they made it right quickly and professionally. Very impressed with Anderic!! The remote itself is by far the best Google TV / TCL remote available with the backlight feature and Bluetooth! Order processing and shipping time was super quick. Remote required no programming. TV Remote replacement In 1999, Dan's Electronics Etc., Inc. discovered a need for replacement remote controls and started manufacturing with our Anderic brand. Since then, we have expanded to hundreds of models to choose from for a wide array of devices We were the first to manufacture replacement remote controls for discontinued major-brand remotes. We attempt to extend the life of your equipment with our highest-quality replacement remote controls. Use this bar to show information about your cookie policy. Click on image to zoom Anderic UC7078T / CHQ7078T with Reverse Ceiling Fan Remote Control - RR7078TRThe Anderic RR7078TR remote control replaces the original equipment remotes for Hampton Bay and Harbor Breeze ceiling fans, including the UC7078T and CHQ7078T, and is compatible with your existing fan receivers. The RR7078TR will work right out of the package for compatible Hampton Bay and Harbor Breeze ceiling fan models listed (but not limited to) without any programming.To Pair you must align the dip switches to the correct pattern to match your ceiling fan receiver.Additional information:This remote only works with Ceiling FansWhat's included: RR7078TR remote control & Wall mount bracket (with two screws for mounting)This remote operates: Downlights (with dimming), Reverse, Fan off, Fan speed low, Fan speed Medium, Fan speed HighWarning: make sure you use Incandescent bulbs, or your fan will not dim properly. Remote required no programming. TV Remote replacement Hampton Bay Remote. Why I Needed ThisAshley Brooks To view this video download Flash Player So, why are you searching for Hampton Bay Remote Controls? There would be a few particular reasons why for this. Here are the top reasons why our site visitors search for Hampton Bay Remotes:Remote control is not working battery replacement on the remote did not workRemote control has been lostMy Hampton Bay fan is turning by itself is my remote not functioning properly?Having a remote problem? Try these steps first:1. Does the remote have a light that turns on or glows when you press a button on the remote? If not, try the following:Replace the batteries. Do you get a light on the remote now when you press a button? If not,Check the programming. Is there any special programming to sync your remote with the fan? Is there a button on the fan? Check the manual that came with your fan.Check the dipswitches. Are they both set the right way? The remote has dip switches on the back of the remote, possibly under a panel. The fan would have dipswitches inside the fan motor housing.2. If the light is coming on the remote now, and you have tried all the above troubleshooting, and still the fan does not respond to the remote,You may need to check the internal wiring on the fanThe receiver on the fan may be bad.Dip Switch Problems with Hampton Bay RemoteIf your fan comes on by itself, or if you have two fans that both get turned on by the same remote, than you need to change your dipswitches. On the back of the remote, as well as in the fan housing, youll have a set of dip switches. These are switches that can be either pushed to a 0 or 1 position (up or down). In order for the remote to communicate with the fan, the dip switches both need to be set in the same direction.Replacing a Hampton Bay Remote ControlIf youve checked the batteries on the remote, checked the dip switches, and your fan remote is still not working, check the light. When you press the button the remote, does the light come on? If there is no light that comes on the remote at all, then it probably would be a good idea to replace the remote. If you have a Hampton Bay fan, then you should get a Hampton Bay remote to replace the existing.Easily one of the most replaceable accessories when it comes to ceiling fans, the Hampton Bay remote control can stop functioning or easily get lost over time.If you dont know what remote will work with your fan, than its usually best to get a universal remote. If you purchase a Hampton Bay universal remote, chances are higher than 80-85% that it will work with your Hampton Bay fan. These universal remotes work with other brands as well, but have the highest compatibility with other Hampton Bay fans.Finding a Universal Hampton Bay Remote that works with my fanIf you dont know what remote works with your fan, it may be best to look for a Hampton Bay Universal Fan Remote. If you purchase a Hampton Bay universal remote, chances are it will work with your Hampton Bay fan. To make sure, you can check the product details of the remote you are looking at. Typically it will say what fan it works with.Heres some general rules to follow regarding your Hampton Bay fan& remote dilemma:If you have a Hampton Bay fan that works with a remote, and your fan is less than 5 years old, a universal Hampton Bay remote should work with your fan.If your fan has never worked with a remote, you cant just buy a remote and it will work with it. If your fan uses pullchains, youll have to continue using pullchains.To find the actual remote that works with your fan as recommended by the manufacturer, try checking your manual that came with your fan. If you cannot find your manual, try searching for it online. Worst case scenario, go to the home depot community support forums on the Internet and post a question. You will get hope from Hope Depots online helpers.Replacement Hampton Bay Ceiling Fan RemotesPlease note: Not all of these replacement remotes are manufactured by Hampton Bay (they are not necessarily first party remotes). If you are looking for first party remotes, meaning they are made by Litex (the manufacturer of Hampton Bay), look for the logo on the remote to show its from Hampton Bay. You can also try contacting Litex directly to ask them where you can find the original remote that is manufactured by them, for your specific Hampton Bay ceiling fan.Replaces the following Hampton Bay remote controls: UC7078T CHQ7078T CHQ8BT7078T RR7079T L3H2010FANHD L3H2014FANHD Fan-HD HD5This remote is a great deal for only \$15 USD. It is not manufactured by Litex or Hampton Bay first party. This remote does not include a receiver. This remote will work with a FAN2BR or UC7067FMRX receiver.Hampton Bay UC7078T remote control with reverse and Hampton Bay logoThis one costs \$22, but its actually Hampton Bay first party. It has the logo on it and comes from Hampton Bay (or Litex). Some notes about this remote its not a universal remote, meaning itll work only to replace Hampton Bays UC7078T remote. If you use any other remote, this wont work. Also, this is only the remote no receiver included here. The remote does come with a wall mount but theres no battery! You need to buy a 9 volt battery for it.Hampton Bay UC7083T RemoteThis one is also very well priced at \$18 USD which is great, and its a first party remote stamped with the Hampton Bay logo. A few things to note that Hampton Bay wants you to know. This remote isnt universal, so itll only work with your fan if your fan works with a Hampton Bay UC7083T remote. There are buttons for an up light and downlight there is no reverse function on this remote. A wall mount comes with this remote also. Rating: ( ) Availability: ship within 1 business day Minimum Purchase: unit(s) Maximum Purchase: unit(s) This product is not universal and serves as a replacement specifically for UC7078T remote controls. It is designed as a handheld remote and does not include any additional components. The remote is brand new, genuine Hampton Bay, featuring the logo and UC7078T stamped on the back. A wall mount is included, but a 9V battery is not included.Will this remote work with my Hampton Bay ceiling fan?The UC7078T remote is compatible with several Hampton Bay ceiling fan models. While the list of compatible models may not be exhaustive, here are some of the models known to work with the UC7078T remote: Windward II 54 in. Brushed Steel Ceiling Fan Windward II 54 in. Matte White Ceiling Fan Windward IV 52 in. Matte White Ceiling Fan Windward IV 52 in. Brushed Nickel Ceiling Fan Windward IV 52 in. Oil Rubbed Bronze Ceiling FanPlease note that compatibility may vary, and its always a good idea to double-check with the manufacturer or seller to ensure that the remote is compatible with your specific fan model.
