Archive Securely store enterprise communications and search with deep data insights. Automate Streamline compliance supervision by reducing low-risk content and analyst review fatigue using machine learning models. Capture Collect and retain all digital communications for compliance, legal discovery, and long-term information retention. CASB Protect cloud apps and data with visibility, control, and threat prevention. Collab Protection Extend protection beyond email for all messaging and collaboration tools. Discover Process, analyze and cull more archived information in-house for e-discovery. Email DLP & Encryption Prevent email data loss and encrypt sensitive emails with granular and dynamic rules-based controls. Endpoint DLP Detect and prevent data loss at the endpoint. Enterprise DLP Detect and resolve data loss risk across email, cloud, and endpoints with centralized policies. Email Fraud Defense Protect your brand reputation, meet DMARC requirements to increase deliverability and identify lookalikes of your domains. Patrol Monitor and manage social media compliance with automated workflows and reporting. Prime Threat Protection Stop all human-centric attacks across multiple channels and stages with AI threat detection. Secure Email Relay Increase control and security for application-generated email and accelerate DMARC implementation. Supervision Monitor and supervise digital communications to enable compliance with SEC, FINRA, and other regulations. Track Track, audit, report on and reconcile all content in your capture stream for compliance. ZenGuide Strengthen human resilience through automated, risk-based learning. Proofpoint ZenGuide enables security teams, small and large, to automate and scale personalized learning paths based on an individuals unique risk profile, behaviors and role. It uses people-risk insights across the Proofpoint ecosystem to understand human risk. And it delivers relevant interventions that build security champions and reduce risky behaviors. Adopt risk-based learning that enables organizations to move beyond compliance-driven programs to provide targeted, context-aware education that addresses specific risks and behaviors. Awareness and Behavior Change Programs Scale awareness and behavior change programs by automatically enrolling identified risky employees into a targeted, relevant set of education, interactive simulations and other interventionsthat adapt to behaviors. Increase employee engagement with in-time learning moments and an employee dashboard that recognizes and rewards good security practices, reinforcing desired behavior and fostering a security-minded culture. Eric Hahn, former CTO of Netscape, founded the company in 2002. It has since grown to more than 5,000 team members serving over 2M Customers worldwide. The company went public in 2012. In 2020 it generated more than $1 billion in revenue, making it the first SaaS-based cybersecurity and compliance company to meet that milestone. In 2021 Proofpoint was acquired by Thoma Bravo, a leading private equity software investing firm, in a transaction that valued Proofpoint at $12.3 billion. This is the largest go-private software deal in history.Meet our LeadersView our Corporate Responsibility MissionRead About our Commitment to Sustainability and Social Impact Today, Proofpoint is headquartered in Sunnyvale, California. We have additional offices in Australia, Canada, France, Germany, Ireland, Israel, Japan, Netherlands, Singapore, UAE, United Kingdom, and the United States (California, Colorado, Massachusetts, Pennsylvania, Utah).View Locations Two million customers including 83 of the Fortune 100 rely on Proofpoint security solutions AI is transforming the digital workspace and giving rise to the agentic workspace, where every collaborationwhether by a person or an AI agentintroduces new risks to data. We give organizations the security solutions they need to protect and empower their people while embracing AI securely and productively. Protect humans with world leading AI-based detection from threats targeting them across all the different ways they work in the new digital workspace email, collaboration and messaging tools, social media platforms, cloud apps and file-sharing services. Learn more 01 / 04 Data doesnt lose itself. Behind every incident are the actions of a human being. Careless users mishandle it. Malicious users walk out with it. Compromised user accounts are hijacked to steal it. Non-compliant users abuse it. A new transformed human-centric approach that leverages behavioral data is needed to safeguard information and digital communications. Learn more 01 / 04 Corporate identities are the root of many ways employees workfrom cloud accounts in SaaS apps and authentication tokens that access application databases, to permissions to traverse across the corporate network. This human-centric risk exploited by threat actors must be countered by responding to account takeovers and understanding your risk posture. Learn more 01 / 04 A new human-centric approach to security awareness is needed in a world of increasing threats targeting humans across the different ways they work. Help make your users resilient against human-targeted attacks and guide them to make the correct decisions in the face of risky scenarios. Learn more 01 / 04 Proofpoint Appoints Joyce Kim as Chief Marketing OfficerFormer Zscaler CMO appointment to power Proofpoints next chapter of growth, strengthening its leadership in human-centric data security in the age of AIProofpoint, Inc., a leading cybersecurity and compliance company, today announced the appointment of Joyce Kim as Chief Marketing Officer (CMO), effective immediately. In her role, Ms. Kim will shape Proofpoints global marketing and communications strategy, amplifying the companys brand, go-to-market execution, and demand acceleration initiatives worldwide, reporting directly to Proofpoint CEO Sumit Dhawan.This press release features multimedia. View the full release here: Joyce Kim, CMO, ProofpointMs. Kims appointment underscores Proofpoints commitment to accelerating global growth and reinforcing its position as a defining force in securing the emerging agentic workspace. As organizations navigate the opportunities and risks of AI, Proofpoint is doubling down on its innovation agenda to empower customers to secure people, data, and intelligent agents with confidence.Joyce brings a rare combination of brand-building expertise and cybersecurity acumen to accelerate our next phase as the defining leader in human- and agent-centric security, said Sumit Dhawan, CEO of Proofpoint. "With a proven track record of scaling global marketing engines and a deep understanding of the C-suite buyer, Joyces experience and leadership will be key to building our brand and momentum as the partner of choice for securing people, data, and AI agents.Ms. Kim joins Proofpoint following senior marketing leadership roles across category-defining technology companies. Most recently, she served as CMO at Zscaler, where she oversaw global marketing and communications. Prior to Zscaler, Ms. Kim held CMO roles at Twilio and at Genesys, and earlier marketing leadership positions at Wrike, Arm, Google, and Microsoft. She serves as a member of the board of directors at Quicklogic Corporation and the nonprofit Bring Me A Book at the Stanford Center on Early Childhood.AI is rewriting the rules of business, and security is the foundation that makes this transformation possible, said Joyce Kim. As CMO, my focus is to amplify Proofpoints leadership in data security and share our vision for how organizations can innovate safely in the age of AI. Together, well show the world that trustand the protection of people and datais what fuels meaningful progress.About Proofpoint, Inc.Proofpoint, Inc. is a global leader in human- and agent-centric cybersecurity, securing how people, data and AI agents connect across email, cloud and collaboration tools. November 18, 2025 Proofpoint, Inc., a leading cybersecurity and compliance company, today announced the general availability of its Proofpoint Satori Emerging Threats Intelligence Agent for Microsoft Security Copilot. AI is the force multiplier for defenders, and when partners bring their agentic innovation into the Security Copilot ecosystem, the impact is exponential. Together, were not just building toolswere creating a new era of intelligent, collaborative cyber defense. - Vasu Jakkal, Corporate Vice President, Microsoft Security. The rise of the agentic workspace is reshaping cybersecurity at its core, said Tom Corn, Executive Vice President and General Manager of Proofpoints Threat Protection Group. Our integration with Microsoft Security Copilot brings Proofpoints real-world threat intelligence directly into the defenders workflow, helping organizations instantly identify and prioritize actively exploited vulnerabilities. By uniting collaboration, data security, and AI-driven insights, were empowering organizations to understand and protect what people and agents do with data, giving them the confidence to innovate and scale safely in the age of AI. Microsoft Security Copilot is the first AI-powered security product that enables security professionals to respond to threats quickly, process signals at machine speed, and assess risk exposure in minutes. It combines an advanced large language model (LLM) with a security-specific model that is informed by Microsoft's unique global threat intelligence and more than 84 trillion daily signals. Agents in Security Copilot autonomously manage high-volume security and IT tasks and seamlessly integrate with Microsoft Security solutions and partner solutions. Purpose-built for security, these agents learn from feedback, adapt to organizational workflows with your team fully in-control, and operate securely within Microsofts Zero-Trust framework. Introducing Proofpoint Satori Emerging Threats Intelligence Agent for Microsoft Security Copilot Proofpoint Satori Emerging Threats Intelligence Agent for Microsoft Security Copilot helps defenders accurately identify actively exploited vulnerabilities to effectively prioritize remediation. The agent delivers real-world vulnerability exploitation data drawing from Proofpoints globally distributed sensor network and trusted third-party sources, including Forum of Incident Response and Security Teams (FIRST) Exploit Prediction Scoring System (EPSS), U.S. Cybersecurity and Infrastructure Security Agencys (CISA) Known Exploited Vulnerabilities (KEV) Catalog and others. Through Microsoft Security Copilots chat interface, security and IT pros can inquire about the exploitation status of specific vulnerabilities. Copilot will instantly gather insights from Proofpoint Satori Emerging Threats Intelligence Agent, so the operator can accurately prioritize and report on high-risk vulnerabilities, accelerating remediation. Where to Find Proofpoint Satori Emerging Threats Intelligence Agent Organizations seeking to enhance the effectiveness of their risk-based vulnerability management efforts can access Proofpoint Satori Emerging Threats Intelligence Agent via the Microsoft Security Storefront the Microsoft Security Storefront makes it simple for customers to discover, buy, and deploy agents and other integrated partner solutions that enhance security operations and posture. If you would like to try this agent in GA, go to the Microsoft Security Storefront and click on the Agents tab. From there, you can search for the agent by name under Browse all agents. The Proofpoint Satori Emerging Threats Intelligence Agent is available at no additional cost to Microsoft Security Copilot customers with an active Proofpoint Emerging Threats Intelligence license. How to set up and configure this agent? The setup of Proofpoint Satori Emerging Threats Intelligence Agent for Microsoft Security Copilot is performed in Microsoft Security Storefront. An active Proofpoint Emerging Threats Intelligence license is required to use Proofpoint Satori Emerging Threats Intelligence Agent.To get started, login to to find your Proofpoint Emerging Threats Intelligence API key and enter it when prompted during the agent setup. ### About Proofpoint, Inc.
