Leverage fingerprints: Funding, OI and liquidation cascades

Conversely, you have corporate-controlled L1s aligned with regulated custodians and exchanges. Coinbase's Base chain is already live. Binance's BNB Chain is effectively a corporate ecosystem. Stripe is joining that tier.

The shift shows that while investors expect the market to remain contained, they are hedging against the risk of a sudden drop.

It urges updating the Bank Secrecy Act to recognize decentralized IDs and zero-knowledge proofs as valid identity-verification methods.

What might traders do given these conditions? If holding from lower levels, traders may consider scaling take-profit triggers up according to the price movement (from \$1,200, \$1,250, and \$1,300) while letting the rest ride with a trailing stop. Fresh capital? Traders may wait for a pullback before committing, being mindful of not chasing parabolic moves at all-time highs.

Grok used these insights to flip its previous short position into a long investment, resulting in a 500% portfolio gain within the first day of the competition, said Jaz Azhang, founder and CEO of AI company Stealth, in an Oct. 11 X post.
