The U.S. government now possesses an additional \$14 billion more in Bitcoin. The only question is: What are they going to do with all that digital gold? On Tuesday, the Department of Justice announced it had successfully seized over \$14.4 billion worth of Bitcoin from Chen Zhi, the head of a Cambodia-based business conglomerate alleged to be at the center of a global crypto scam operation. The seizure is, by far, the largest in DOJ history. Now, U.S. prosecutors have filed criminal wire fraud a...

Kobayashi's Feb. 6 sale also coincided with Bitcoin's slide to around \$6,000, which was the lowest point of that year's first quarter. Bitcoin was already falling from its December 2017 peak of nearly \$20,000 during the height of the initial coin offering (ICO) boom.

In the film, this is an argument based on moral intuition alone, without a principled basis and defended only by tautology. None of the ideas' advocates make the normative case for why code should be law, but there must be an instrumental basis for this philosophy beyond moralism.

Digital wallets are essential tools for entering the blockchain world. They are not only used to store cryptocurrencies but also to manage users' digital identities and interact with DApps. According to different storage methods, digital wallets can be divided into hardware wallets, software wallets, and paper wallets. Among them, hardware wallets have the highest security but are less convenient to use; software wallets (including desktop wallets, mobile wallets, and web wallets) are convenient to use but have relatively lower security. Choosing a suitable digital wallet requires balancing security and convenience according to individual needs and asset scale.
