Last week's surge in the stablecoin market cap to \$300 billion and the release of \$1 billion in frozen funds from the defunct exchange FTX were key drivers, Stephen Gregory, founder of crypto trading platform Vtrader, told Decrypt.

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

Part of traders' unease comes from the deteriorating relationship between the US and China, as the ongoing trade war enters a new phase involving export controls on rare earths and sanctions against a South Korean shipping company. US President Donald Trump said on Oct. 10 that the US could respond with an additional 100% tariff on Chinese goods starting Nov. 1.
