Google's newly released AI-powered search results are garnering lots of attention—for the wrong reasons. After the tech behemoth announced a host of new AI-powered tools last week as part of a new “Gemini Era,” its trademark web search results changed significantly, with natural language answers to questions displayed above websites. “In the past year, we’ve answered billions of queries as part of the search-generated experience,” Google CEO Sundar Pichai told the audience. “People are using it...

The iShares Bitcoin ETP began trading on the London Stock Exchange on Monday, with securities physically backed by Bitcoin held through Coinbase, as per the Financial Times report.

Notably, SearchGPT appears to replace Microsoft Bing with its own technology. The videos shared by OpenAI don't show the typical banner indicating that search results are powered by Bing, as with the current version of ChatGPT. And while Google has been integrating AI into its services, SearchGPT's advanced capabilities clearly pose a significant threat.

Catalyst windows can also distort price action. Listings and token unlocks may temporarily overwhelm shallow market depth, especially in illiquid altcoins. This can produce sharp “breaks” that often reverse once order flow normalizes. Research on market microstructure around launches and unlocks shows how depth, fragmentation and positioning can combine to create these head fakes.
