Chart patterns are shapes formed by price movements that help traders anticipate future market trends. These patterns fall into two main categories: reversal patterns, which signal that a current trend may change direction, and continuation patterns, which suggest the trend will likely resume after a brief pause. They stem from market psychology, where emotions like fear, greed and uncertainty drive collective trading behavior and create recognizable shapes on charts.

Surprisingly, the company added that retail long positioning is inversely correlated with price, at -0.86 for ETH, implying that as retail longs reach extreme highs, the likelihood of a reversal grows.

Researchers at tech giant Google said they mapped out the structure of a molecule 13,000 times faster than the most powerful “supercomputers” available today, achieving the first verifiable quantum advantage.
