SearchGPT is the latest development in what appears to be a new era in web search, which The Verge's Nilay Patel has termed "Google Zero." This approach prioritizes practicality over variety: instead of presenting a list with different sources and approaches to a specific query, which encourages users to do their own research, AI-powered search engines opt for a more direct tactic, providing concise, summarized information responding exactly to what users are looking for.

These include conspicuously posted warnings about speculative risk, which direct the user to informational pages and other prompts designed to alert the user and mandated know-your-customer requirements.

If BTC continues to follow its prior fractal, the market may enter a consolidation phase lasting several weeks. In Q1, the recovery phase extended nearly 45–55 days, forming a true bottom only in late April. Applying the same timeline suggests that a gradual recovery may not materialize until late November or early December.
