Digital wallets are essential tools for entering the blockchain world. They are not only used to store cryptocurrencies but also to manage users' digital identities and interact with DApps. According to different storage methods, digital wallets can be divided into hardware wallets, software wallets, and paper wallets. Among them, hardware wallets have the highest security but are less convenient to use; software wallets (including desktop wallets, mobile wallets, and web wallets) are convenient to use but have relatively lower security. Choosing a suitable digital wallet requires balancing security and convenience according to individual needs and asset scale.

Thus, other on-chain analysts have recently floated the idea that the \$14 billion worth of BTC that disappeared in 2020 was potentially never stolen at all; or, alternatively, that the heist was pulled off by the U.S. government, or hackers working for the government.

Although Galaxy's business focuses on financial services and asset management, the company is also engaged in data center infrastructure. The firm said it remained on schedule to deliver power to AI cloud computing platform CoreWeave in the first half of next year.
