If a developer deploys an immutable contract, then the moment an exploit is discovered, without a legal superstructure to support participants, the entire system will become unusable. And it is unrealistic to expect developers to develop perfect code. It is far easier and more effective to implement flexible rules that can be administered by humans (i.e., laws) than it is to imagine, beforehand, every possible risk scenario that could ever arise.

As Cointelegraph reported, the bull market was also reflected in exchange-traded products, with BlackRock noting that its Bitcoin and Ether iShares funds contributed positively to quarterly earnings, driven by strong investor inflows and fee income.

CryptoQuant author Axel Adler Jr. said that the Bitcoin Unified Sentiment Index is in the “extreme bearish” zone, indicating capitulation or panic among investors.
