When you've been around markets long enough, you start to see patterns. The tools we trade on and the rails we build on are never static. In crypto, one of the biggest shifts happening right now is at the base layer.

How has it worked out? During the late-2024-to-mid-2025 rally, media estimates pointed to unrealized gains of \$300 million by December 2024, rising to portfolio values north of \$700 million months later, implying hundreds of millions in profit at peak. Figures move with price, but the pattern was clear in that upswing: Disciplined buying built a meaningful position.

At the network level, institutional staking could enhance security and protocol stability. However, it may spark concerns about centralization if large funds dominate validator roles. This could affect yields and governance balance. Grayscale's staking-enabled ETPs will shape upcoming funds, influencing standards for transparency, risk disclosures, taxation and investor safeguards.
