"The elephant in the room is are DATs really justified?" Chu questioned, noting "without a credible business case, rigorous governance, robust custody, and transparent risk controls, such DAT structures can become misaligned with shareholder interests and could invite the kind of liquidity and governance risks regulators worry about."

By offering regulated and user-friendly investment products, Grayscale allows investors to gain exposure to cryptocurrencies without the challenges of managing wallets, operating nodes or dealing with validator risks. Through staking-enabled offerings like the Grayscale Ethereum Trust (ETHE) and Grayscale Solana Trust (GSOL), Grayscale has integrated the yield-generating features of blockchain networks with the regulatory and custodial standards of traditional finance.

This article discusses what crypto staking is, what has prevented greater institutional participation and how Grayscale has encouraged the institutionalization of crypto investment. It also highlights regulatory and market changes surrounding staking and explains how Grayscale's spot crypto ETPs deliver staking yields to investors. Finally, it outlines the risks associated with staking funds and shows how Grayscale's ETPs have shifted crypto from a price-tracking asset to an income-generating one.

For those new to the campaign, Algorand is a strategic initiative designed as a guided tour of the Algorand ecosystem. Running until Dec. 29, the campaign transforms onchain activity into a game.
