The experts suggest not yet.

“Visually, the chart makes it clear that there is a major redistribution taking place: Bitcoin is moving from long-term holders into new addresses managed by ETFs,” he told Decrypt. “As ETFs create demand, supply is being provided by old holders.”

Liquidation context: After a fast wick and cascade, avoid chasing. Snapbacks are common once forced flows clear.

The Average Directional Index, or ADX, sits at 33, well above the critical 25 threshold that confirms a strong trending market. Think of ADX as your “trend strength meter”—it doesn’t care about direction, just whether a real trend exists. Below 20, you’re in choppy waters where false breakouts are common. Above 25, you’ve got momentum. At 33, BNB is firmly in trending territory, meaning institutions and retail are moving in the same direction, creating sustained buying pressure that can carry prices significantly higher.

Blockchain technology is rapidly developing worldwide, becoming an important driving force for digital transformation. As a distributed ledger technology, blockchain ensures data security and immutability through decentralized means. In the financial sector, blockchain technology has begun to transform traditional payment, clearing, and settlement processes, improving efficiency and reducing costs. At the same time, blockchain has shown tremendous application potential in various fields such as supply chain management, healthcare, and public services. With the continuous maturity of technology, we have reason to believe that blockchain will lay a solid foundation for the future digital economy.

Prosecutors said Armbrust’s actions were not a “momentary lapse in judgment” but a deliberate misuse of company computing resources for personal gain, causing real financial losses and operational disruption.
