Chart patterns are shapes formed by price movements that help traders anticipate future market trends. These patterns fall into two main categories: reversal patterns, which signal that a current trend may change direction, and continuation patterns, which suggest the trend will likely resume after a brief pause. They stem from market psychology, where emotions like fear, greed and uncertainty drive collective trading behavior and create recognizable shapes on charts.

The film uses the human angle to frame a debate that was prevalent at the time. When an attacker takes money from a smart contract, relying on the contract's internal logic to obtain tokens outside of the creator's intention, is that wrong? Should the attacker be censured, legally or otherwise, or is this simply fair play?

Zeta Network Group's chief investment officer, Patrick Ngan, said in a statement shared with Decrypt that the balance-sheet allocation reinforces the group's "long-term financial position," adding that the move could enhance their financial resilience through "an instrument that combines Bitcoin's scarcity with sustainable yield."

He adds that while a 25 basis-point rate cut by the Federal Reserve is priced in as highly likely, "failure to see a cut at the next FOMC will make September a lot more painful."
