Sean Dawson, head of research at Derive, told Decrypt the bearish hedging is concentrated on specific price targets and timeframes.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the

continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

In April, Google joined Meta, OpenAI, and other generative AI developers in pledging to enforce guardrails that would keep their respective AI models from generating child sexual abuse material (CSAM).

In 2008, the “financial crisis” saw a large GDP contraction, a surge in unemployment, and a 56% drop in the S&P; 500. It was triggered by a subprime mortgage crisis, banking system collapse, and credit freeze.

The relative strength index is still below the 50 mark, suggesting that market conditions still favor the downside.

But there’s other big market players to consider, like Bitcoin treasury companies, according to Rick Maeda, a research analyst at Presto Research. He’s especially interested in ones like Japan’s Metaplanet, which has sworn off ever selling its BTC stash.
