In general, both retail and institutional investors continue to focus on buying and holding tokens for price gains rather than staking them. Operating validator nodes requires substantial capital, technical know-how and uninterrupted uptime. It also exposes participants to risks such as slashing penalties and custody challenges. Additionally, in many jurisdictions, the regulatory treatment of staking rewards remains unclear.

“Not liking this Ethereum weekly MACD cross to red after 22 weeks green,” said analyst CRYPTO Damus in a Tuesday post on X, adding that the last three times the bear cross occurred were followed by significant ETH price drops.
