Mauzy argued Armbrust was not a “malicious hacker” but instead was someone acting out of “desperation and despair,” noting how his client made no attempt to conceal the activity and had taken full responsibility for the losses.

With Google’s new update, when a request to remove non-consensual deepfake websites found in a search is received, Google will also work to filter similar search results that include the name of the person being impersonated.

At the network level, institutional staking could enhance security and protocol stability. However, it may spark concerns about centralization if large funds dominate validator roles. This could affect yields and governance balance. Grayscale's staking-enabled ETPs will shape upcoming funds, influencing standards for transparency, risk disclosures, taxation and investor safeguards.

Armbrust's covert crypto mining scheme used Digital River's resources "between 6 p.m. and 7 a.m. daily" and transferred the Ethereum to his own crypto wallet, according to Endicott.
