Blockchain development is a complex and professional job that requires developers to master multiple technologies and tools. Blockchain development languages mainly include Solidity (Ethereum), Go (Bitcoin, Hyperledger Fabric), Rust (Solana, Polkadot), etc. In addition, developers also need to understand related knowledge such as cryptography, consensus algorithms, and distributed systems. With the popularization of blockchain technology, the demand for blockchain development talents is also growing. For enterprises, through blockchain development, they can build their own blockchain solutions, improve business efficiency, reduce costs, and create new business value.

Deployers can set a fee share of up to 50% on top of the base fee rate and will be defining the markets, including oracle and contract specifications. They will also be setting the oracle prices, leverage limits and settling if necessary.

By Monday, Bitcoin rebounded to around \$115,000, almost erasing the weekend losses. Hougan said the rapid recovery indicates the strength of blockchain infrastructure. "The damage was contained to individual investors," he added, noting that no major institutions collapsed during the event.

That may not seem like a significant supply shock in today's Bitcoin economy. On Wednesday, Bitcoin had a \$2.24-trillion market capitalization, but back in early February 2018, that number stood at roughly \$140 billion, when Kobayashi's sales represented about 0.26% of the asset's total value.
