Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the

continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

Modern encryption key lengths range anywhere from 2,048 to 4,096 bits, with current quantum computers only able to break keys of about 22 bits in size or less, Mental Outlaw said.

market capitalization is about 4.6 times larger than Ethereum's, standing at roughly \$2.17 trillion compared to \$476.33 billion, according to CoinMarketCap.

The exponential moving averages, or EMAs, paint an even prettier picture. These weighted averages give more importance to recent price action, helping identify dynamic support and resistance. For BNB, the setup is textbook: the 50-day EMA rises beneath current price around \$1,050-\$1,070, providing a cushion for pullbacks. The 200-day EMA sits lower still, confirming the longer-term uptrend.

Analysts remain wary of digital assets' future price path as markets reckon with a re-escalation of the Trump administration's global trade war, inflation and economic worries, and other macroeconomic uncertainties. "It's likely too early to tell if this is the bottom though as wider markets are choppy, particularly gold," James Butterfill, global head of research at crypto asset manager CoinShares told Decrypt.
