The National Bureau of Economic Research (NBER) tracks four main indicators to identify recessions: employment, personal income, industrial production and retail sales.

Creditors will sell U.S. debt as they grow worried about its ability to function as a store of value, he said. That will likely put the Federal Reserve in a tough position, Dalio added, where it has to decide between rising interest rates and a debt default crisis or printing money to buy debt and “try to hold real interest rates down, which will lower the value of money.”

While ChatGPT is a great “general-purpose” large language model (LLM), Claude — another AI model — is mainly used for coding, the analyst told Cointelegraph, adding:
