Prediction market gurus have plenty on their plate this week, between NFL kickoff and forecasting the next crypto market moves after recent all-time highs.

While the \$20 million plan was designed as a short-term measure, the latest proposal seeks to make buybacks perpetual, embedding them directly into the DAO's governance and treasury management. The move would shift Aave from opportunistic market reactions toward a systematic, rule-based capital strategy, echoing corporate-style financial management.

“These protections have already proven to be successful in addressing other types of non-consensual imagery, and we've now built the same capabilities for fake explicit images as well,” Google said. “These efforts are designed to give people added peace of mind, especially if they're concerned about similar content about them popping up in the future.”

The historical drag of September's bearish seasonality, meanwhile, is forcing U.S. investors to reassess their positions ahead, as they look toward the end of the financial year on September 30.

His post later prompted a response from Ethereum co-founder Vitalik Buterin, who made a point to acknowledge Polygon's achievements in the broader Ethereum community.
