Blockchain development is a complex and professional job that requires developers to master multiple technologies and tools. Blockchain development languages mainly include Solidity (Ethereum), Go (Bitcoin, Hyperledger Fabric), Rust (Solana, Polkadot), etc. In addition, developers also need to understand related knowledge such as cryptography, consensus algorithms, and distributed systems. With the popularization of blockchain technology, the demand for blockchain development talents is also growing. For enterprises, through blockchain development, they can build their own blockchain solutions, improve business efficiency, reduce costs, and create new business value.

Each fund features a unique reward structure. ETHE pays staking rewards directly to investors, while ETH and GSOL incorporate rewards into the fund's net asset value (NAV), gradually impacting share price. After deductions for custodian and sponsor fees, investors receive a net yield from validator rewards.
