Offering tokenized stocks has become a point of focus for many U.S.-based crypto companies. Crypto exchange Coinbase has said it wants to tokenize stocks since before its IPO and recently renewed the push. Trading platform Robinhood made waves in early July when its tokenized stock offerings included private companies—namely OpenAI and SpaceX.

Blockchain security is the foundation and guarantee for the development of blockchain technology. Due to the complexity of blockchain systems, their security issues involve multiple aspects such as cryptography, consensus mechanisms, and network security. Common security threats include 51% attacks, smart contract vulnerabilities, private key leakage, etc. To ensure the security of blockchain systems, measures need to be taken from multiple levels such as technology, management, and law. With the widespread application of blockchain technology, blockchain security will become increasingly important and will attract more professional talents to engage in it.

At the same time, Grewal wants Treasury to publish guidance recognizing and incentivizing decentralized IDs and zero-knowledge proofs as valid forms of customer verification and blockchain analytics clustering for Anti-Money Laundering compliance.
