However, he predicts that in a few years the blockchains built by these companies will most likely be abandoned when they “cause too big a headache from a technical point of view,” and after users choose to avoid them because they aren’t attractive enough from a “DeFi/self-custody/control-my-asset point of view.”

Liquidation cascades: Leveraged positions are automatically closed when margin runs short. When price hits clustered stop or liquidation levels, forced selling or buying accelerates the move. It often snaps back once excess leverage is cleared. That snapback leaves the classic bull or bear trap footprint seen repeatedly in Bitcoin

Defense attorney William J. Mauzy said Armbrust’s actions took place “during a time of extreme financial need and considerable emotional distress,” as he cared for his ailing mother, who has since died.

He also thinks APIs face challenges such as a lack of standardization and regulatory fragmentation, which a guidance “outlining acceptable use cases” would solve by clearly showing “data privacy requirements and standards for interoperability — allowing firms to confidently adopt and integrate APIs into their programs.”
