In other words, the analysts think depositors in emerging markets care more about knowing they'll retain access to their money than earning interest on it.

With Grok 4, you can automate the first round of filtering — for example, summarizing white papers, spotting tokenomics red flags and checking liquidity. By the time you get to manual research, you are already down to the 10% of projects that actually deserve your attention.

According to the Director of Global Macro at Fidelity, Jurrien Timmer, the recent pullback resembled the late-1990s “super bull” phase, when speculative assets saw sharp but temporary drawdowns before surging higher again.

Watch for spoofs, large bids or asks that vanish on contact, creating the illusion of support or resistance. Spoofing is unlawful in regulated futures markets, and similar patterns have been documented on crypto exchanges. Treat sudden order book shifts with caution.
