Crypto native founders can also experiment with tokenomics, governance models, or crosschain integrations when it takes incumbents to run a risk assessment.

If you've ever been pulled over by a bad cop, you know exactly how this can go wrong, but the truth is, there is today no rigid system that is as effective as a flexible one. Maybe someday computers, building out large language models or other artificial intelligence, will be capable of equally effective discretion, but for now, code as law is simply worse.

The first, as is highlighted in Craig's film, is that it is incredibly difficult to build code that is robust enough to regulate human behavior in the range of circumstances it is likely to encounter. This issue comes from a mismatch between the rigid logical nature of code and the fluidity of human behavior.

"What that means is that when you remove a result from search under our policies, in addition, what we'll do is on any query that includes your name—or would be likely to surface that page from search—all explicit results will be filtered," the spokesperson said. "So not all explicit results will be removed, but all explicit results will be filtered on those searches, which prevents them from appearing on searches where it would be likely to show up."
