A Uniswap engineer said the team did not specifically build the integration for Solana, but rather designed “architect layers” that were platform-agnostic.

“The \$9 million transfer that Arkham and others have cited was simply a transfer to another wallet under his control. He did not send those funds to an exchange (yet),” he said. But he cautioned that it’s possible that World Liberty has access to non-public information that explains the blacklisting.

Cross-referencing with fundamentals and development activity filters out short-term buzz that isn't backed by progress or transparency.

OpenAI has announced its intention to enter the search engine market with the announcement of SearchGPT, an AI-powered search engine that aims to make searching more natural for users. Although described as a “temporary prototype,” the Thursday reveal is a clear shot across the bow of the singularly dominant Google—as well as Microsoft Bing, which currently provides search results for OpenAI's ChatGPT.
