When shorter-term EMAs trade above longer-term ones like this, traders see it as a good sign. This configuration suggests money is positioned bullishly across multiple timeframes, from swing traders watching the 50-day to long-term holders focusing on the 200-day. Watch the candlesticks on weekly timeframes, and the gap between both averages is also bullish, and increasing over time.

The split extended to how candidates viewed blockchain technology versus direct crypto investment.

Indeed, a simple, repeatable rule can act both as a policy signal and as an operational habit for long-term accumulation.

The index combines three components to capture overall market psychology: the Fear & Greed Index (reflecting macro mood and volatility), CoinGecko's up/down votes (reflecting retail sentiment) and a rolling normalization layer that aligns both in a one-year window.
