Research firm 10x Research also reported on Saturday that major DATs such as Metaplanet and Strategy were trading near or below their NAVs.

"The bill ensures that the companies driving up New Yorkers' electricity rates pay their fair share, while providing direct relief to families struggling with rising utility costs," Senator Krueger said in a statement when S8518 was introduced.

Part of this growth is being driven by improvements in underlying blockchain infrastructure, with some networks now processing over 3,400 transactions per second, a more than 100-fold increase in throughput over the past five years.

Restricted Mass Market Investments (RMMI), which includes most cryptocurrencies, are classified by the regulator as having a medium risk profile, allowing the investments to be marketed to the public under strict consumer protection guidelines.

A key technical signal to watch is the 200-day exponential moving average (EMAs), which BTC has held for nearly six months. In the previous cycle, it maintained this trend from October 2024 to March 2024 before briefly losing it during consolidation. This time, the trendline has held from April to October 2025, with the price possibly losing the trendline in the coming days.
