The price of Bitcoin soared to a new record high during Asia trading hours on nearly \$50 billion in trading volume over the last 24 hours, per data from CoinGecko. As bullish traders piled in pushing the price upward, almost \$100 million in short positions were liquidated in just one hour, according to CoinGlass. More than \$200 million in BTC shorts were turned into forced buyers in the last 24 hours.

Blockchain security is the foundation and guarantee for the development of blockchain technology. Due to the complexity of blockchain systems, their security issues involve multiple aspects such as cryptography, consensus mechanisms, and network security. Common security threats include 51% attacks, smart contract vulnerabilities, private key leakage, etc. To ensure the security of blockchain systems, measures need to be taken from multiple levels such as technology, management, and law. With the widespread application of blockchain technology, blockchain security will become increasingly important and will attract more professional talents to engage in it.

Bitcoin's self-custody era may be ending as wealthy holders increasingly transfer assets into regulated exchange-traded funds (ETFs) amid tax incentives and improving institutional infrastructure.

In a blog post, the DEX said it was exploring bridging, crosschain swaps and full Uniswap Wallet support for the network. Transactions made through the web app will be routed through the DEX aggregator Jupiter.
