It argued that Aave's treasury had enough surplus cash to execute the buyback without compromising its operational expenses or reserves.

"Bitcoin was easy because it's the gold standard for crypto," the continued. "We believe Trump coin is undervalued, considering that it's the coin backed by the President of the United States, who is not only popular in the United States but a global figure respected and followed all over the world."

Jonathan Morgan, the lead crypto analyst at trading app Stocktwits, added that this is likely the result of "mechanical selling" from traders who simply buy and sell based on the expectation of a four-year cycle.

They would not provide certain benefits, though, including payments of interest on account balances or overdraft privileges. They might also impose caps on balances, in a bid to control for “various risks to the Federal Reserve and the payment system.”
