However, the next bear market will be defined by the business cycle, explained Woo. The last business cycle downturns that really took hold were 2008 and 2001, before crypto markets were invented, he said.

Hash rate is the measurement of all the computing power on the leading cryptocurrency's network.

next move or explore upcoming altcoin rallies, you'll gain practical skills to interpret price action. With a clear, step-by-step approach, it helps you build a solid foundation for crypto trading and avoid common mistakes.

U.S. Triestina 1918 plays in Serie C, Italy's third-highest division of professional soccer. The club is currently in last place, and was recently assessed an administrative penalty that deducted 13 points from its standings.

The referral system also proved to be a growth driver, with 25,212 new users brought into the Algorand ecosystem through invitations from friends. By the end of the week, 4,215 participants had successfully completed all the required quests and claimed their non-fungible token (NFT) badges.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.
