The price of the two biggest digital assets has in the past risen significantly when investors have bought shares of the American ETFs.

BNB Chain sees record user activity, transactions up 151% in 30 days

At the network level, institutional staking could enhance security and protocol stability. However, it may spark concerns about centralization if large funds dominate validator roles. This could affect yields and governance balance. Grayscale's staking-enabled ETPs will shape upcoming funds, influencing standards for transparency, risk disclosures, taxation and investor safeguards.
