While we abstract it away in our discussions, this final step, the violence, is the basic quantum of all regulation. And as long as governments have armies, and developers and hackers do not, those who believe code is law will be unable to enforce their priors on the rest of us.

Finally, enforce safety and governance. Given moderation issues and risks of single-source reliance, set a hard rule that no Grok-generated signal can directly

trigger live trades without external verification. Multiple independent checks should always precede capital deployment.

Paradigm has invested widely across the market, covering anything from DeFi and NFTs to blockchain security, infrastructure and startups.

SearchGPT is the latest development in what appears to be a new era in web search, which The Verge's Nilay Patel has termed "Google Zero." This approach prioritizes practicality over variety: instead of presenting a list with different sources and approaches to a specific query, which encourages users to do their own research, AI-powered search engines opt for a more direct tactic, providing concise, summarized information responding exactly to what users are looking for.
