OpenAI's foray into live web search has been long rumored, especially given the limitations of typical large-language models, which rely on a large but static corpus of data collected up to a point in time, limiting its knowledge of current events.

"This facilitated capital inflows to Bitcoin, pushing its dominance close to 60%," Gregory noted.

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also

greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.
