Chart patterns are shapes formed by price movements that help traders anticipate future market trends. These patterns fall into two main categories: reversal patterns, which signal that a current trend may change direction, and continuation patterns, which suggest the trend will likely resume after a brief pause. They stem from market psychology, where emotions like fear, greed and uncertainty drive collective trading behavior and create recognizable shapes on charts.

House of Doge telegraphed its deeper move into sports, telling Decrypt last week that it intends to tokenize multiple elements of mainstream culture, starting with sports.

At the frontier, where these structures haven't been established yet, strong individuals can maximally exploit that strength to dominate others. That is freedom to those who want that or otherwise possess heterodox views and wish to exercise them away from propriety's watchful eyes.

Bitcoin's spot demand has been contracting over the past week, signaling a waning of retail interest, according to data from CryptoQuant.

This will allow customizable lending markets while pooling liquidity through "hubs," improving efficiency and scalability.

In the past week, though, Metaplanet has faced headwinds. On Monday, the company's shareholders approved an \$884 million capital raising proposal, although the firm's stock dropped 60% since mid-June.
