The guild also warned producers that they “may not use synthetic performers without complying with our contractual obligations, which require notice and bargaining whenever a synthetic performer is going to be used.”

In a major show of force for Stripe's upstart blockchain project Tempo, the company has reportedly raised \$500 million—and nabbed one of the Ethereum network's most prominent core developers, as well.

This surge in activity also served as a real-world stress test for the Algorand blockchain. With tens of thousands of participants generating nearly 300,000 transactions, the network maintained its performance. Users experienced the platform's "low fees, instant transaction finality and zero transaction failures" firsthand.

Crypto price charts visually represent price movements across different timeframes, providing insights into trends, volatility and trading opportunities. In a fast-paced crypto market, open-high-low-close (OHLC) data enables investors to track price changes within specific periods, forming the core of technical analysis.
