Chart patterns are shapes formed by price movements that help traders anticipate future market trends. These patterns fall into two main categories: reversal patterns, which signal that a current trend may change direction, and continuation patterns, which suggest the trend will likely resume after a brief pause. They stem from market psychology, where emotions like fear, greed and uncertainty drive collective trading behavior and create recognizable shapes on charts.

The NAV normalization has created a rare entry point for smart investors. Companies now trading at or below NAV offer pure Bitcoin exposure with optionality on future alpha generation and upside from any trading profits.

He touted BTC as one of the hard money assets that can save the ailing economy, meaning the prices of gold and BTC will continue to rise in the face of currency inflation as individuals and businesses adopt BTC to protect purchasing power.
