Bitcoin and Gold Jump as Stocks Dip Amid US Government Shutdown

Quantum computers are not yet powerful enough to crack encryption standards, according to Mental Outlaw, a pseudonymous YouTuber who covers technology.

“This redistribution is quite unique,” he said. “We’ve already seen three such periods—summer 2024, fall 2024, and summer 2025. In previous cycles, this usually happened only once.”

How Grayscale's spot crypto ETPs are delivering staking yield to investors

The next crypto bear market could be particularly brutal and driven by a business cycle downturn that has never been seen in crypto before, according to analyst Willy Woo.

A high hash rate is important because it means more computing power is being used to keep the cryptocurrency's network secure. And the more computing power used, the harder it is for attackers to take control of more than 50% of the Bitcoin network.
