“This is the largest decline since 1973—more than 50 years ago,” Stephen Gregory, founder of crypto trading platform Vtrader, told Decrypt.

The NAV normalization has created a rare entry point for smart investors. Companies now trading at or below NAV offer pure Bitcoin exposure with optionality on future alpha generation and upside from any trading profits.

Did you know? In 2025, Ether ETFs began allowing onchain staking, letting investors earn yield without ever touching a crypto wallet.

An experimental version of the resulting token is already available on the onchain lending protocol Morpho. Still, it is in the testing phase, with a total liquidity in the market of \$14 in USDC

The relative strength index is still below the 50 mark, suggesting that market conditions still favor the downside.

But the second problem with the code-is-law idea is more damning. While the model of regulation suggested here so far has been of a reactive system that arises to fill the need for authority, some political scientists — realists — view it the other way.
