"In practical terms, this means HIVE is scaling production of Bitcoin much like a growth business scales output of a core product," he wrote. "Each incremental exahash increases daily production and revenue potential, while our HPC division provides a complementary revenue stream that grows with demand for compute power. "

As Cointelegraph reported, crypto investment products showed strong resilience during last week's market turbulence, recording \$3.17 billion in inflows despite a major flash crash triggered by renewed US-China tariff tensions, according to CoinShares.
