Experts say this automation is a crucial source of protection against "the rising tide of software supply chain attacks targeting cryptocurrency," and proves effective even if malware isn't accompanied by social engineering attacks.

Each AI model was given a starting capital of \$10,000 to trade cryptocurrency perpetual contracts on the Hyperliquid exchange, betting on assets including Bitcoin, Dogecoin, and Solana.

This suggests that a price rebound may lack the momentum derived from consistent buying pressure, potentially leading to a deeper pullback.

“What that means is that when you remove a result from search under our policies, in addition, what we'll do is on any query that includes your name—or would be likely to surface that page from search—all explicit results will be filtered,” the spokesperson said. “So not all explicit results will be removed, but all explicit results will be filtered on those searches, which prevents them from appearing on searches where it would be likely to show up.”
