## Comprehensive Guide to okex buy usdt

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

Etherscan is a blockchain explorer designed for the Ethereum ecosystem. It’s widely used by individuals, developers and institutions to verify transactions, monitor smart contracts and analyze token activity. Its reliability and extensive onchain data make it one of the most trusted tools for tracking Ethereum network activity.

Bitcoin dropped below $108,000 per coin in September as the biggest digital coin started "showing signs of exhaustion," according to Glassnode analysts, as long-term holders took profits and ETF flows slowed down.

or ERC-20 tokens benefits from a reliable block explorer. These tools make it easier to verify decentralized finance (DeFi) transactions, follow non-fungible token (NFT) mints and inspect smart contract activity, offering a transparent view of what’s happening on the Ethereum network.

Analysts remain wary of digital assets' future price path as markets reckon with a re-escalation of the Trump administration's global trade war, inflation and economic worries, and other macroeconomic uncertainties. "It's likely too early to tell if this is the bottom though as wider markets are choppy, particularly gold," James Butterfill, global head of research at crypto asset manager CoinShares told Decrypt.

Investors piled back into Bitcoin ETFs and their Ethereum counterparts Tuesday, reversing days of outflows, although the fresh investments failed to give the two largest cryptocurrencies by market value a long-lasting bump.
