One of the meme coin devs asked the gym influencer for a picture, but when he attempted to nab Martyn's hat, he was slapped across the face as the fitness creator exclaimed, "You think that shit's funny? Get the fuck out of here."

When the usage moves beyond consumer transactions into payments infrastructure, institutional use, remittances and treasury operations, different strengths of BTC, ETH and XRP become more visible.

Without real demand, any breakout attempt might lack the strength required to push ETH above key levels.

"The number of new packages that get published on a daily basis is posing a challenge for security organizations, and ML model-based detection is currently the best answer that the security industry can provide," ReversingLabs engineer Karlo Zanki said.

Its daily relative strength index (RSI) readings have been persistently above 70 in the past month, indicating that the asset is overbought and risks profit-taking.

Notably, GPT-5 was down over the same period by about 29%. According to Nof1, the model adopted a distinctly cautious and risk-averse strategy. Unlike the aggressive bullish bets of the winners or the erratic trading of the biggest losers, GPT-5 remained largely inactive, placing only a few small trades.
