There is a clear spectrum emerging. On one end, there are fully decentralized, censorship-resistant protocols. These chains may lack the polish or compliance comfort institutions crave, but they're the crucibles where real innovation happens. Ethereum in its early days, Bitcoin still today, newer privacy chains pushing the edges of what's possible without KYC gates.

Decentralized exchange Hyperliquid introduced a new update that allows third parties to launch their own perpetual swap contracts on its platform.

Catching a coin's name trending on X or in a Telegram chat isn't enough to justify putting capital at risk. Social buzz moves fast, and most spikes fade before price

action catches up, or worse, they might be the result of coordinated shilling. That's why the next step is to turn raw noise into structured signals you can actually rank and compare.

"When corporations gain too much legibility and influence over open source projects, priorities start to drift away from the community's long-term vision and toward corporate incentives. That's how misalignment begins."

For Solv Protocol, the deal marks one of the largest public-market integrations for its wrapped Bitcoin product to date, though the move also limits participation to qualified investors and may dilute existing shareholders.
