Outside its core trading business, Galaxy is moving into data center and high-performance computing infrastructure. Its Helios campus in Texas is a key part of that push, though it isn't expected to generate meaningful profits until mid-2026.

"The important element of blockchain is a system that gets rid of a central entity. It comes at a cost: A very complex technology that's hard to build and hard to use. Even if we apply AA to create simplified UX, the tech under the hood is still very complex," he said, presumably referring to account abstraction, a technology that makes wallets smarter and easier to use.
