The pair's Solana token pumped over 2,000%, and they later thanked the gym bro for slapping them.

Some analysts speculated that up to 99% of creditors might sell once they received their share. But when repayments actually began, there was “no significant spike” in trading volume, according to CryptoQuant founder Ki Young Ju.

If BTC continues to follow its prior fractal, the market may enter a consolidation phase lasting several weeks. In Q1, the recovery phase extended nearly 45–55 days, forming a true bottom only in late April. Applying the same timeline suggests

that a gradual recovery may not materialize until late November or early December.

The deal gives Ripple infrastructure to manage digital assets held in corporate treasuries, including stablecoins and tokenized deposits, which can be used to generate yield for clients, according to a Thursday announcement.

With Grok 4, you can automate the first round of filtering — for example, summarizing white papers, spotting tokenomics red flags and checking liquidity. By the time you get to manual research, you are already down to the 10% of projects that actually deserve your attention.
