Comprehensive Guide to okx c'est quoi

Did you know? In 2025, Ether ETFs began allowing onchain staking, letting investors earn yield without ever touching a crypto wallet.

That is, of course, if you trust that the planets will align and the trend will remain valid until new year's eve.

Some analysts speculated that up to 99% of creditors might sell once they received their share. But when repayments actually began, there was “no significant spike” in trading volume, according to CryptoQuant founder Ki Young Ju.

The exchange lost around 650,000 BTC in thefts that went undetected from 2011 until its 2014 collapse, while about 200,000 BTC was later found in an old-format wallet. Those coins became the foundation for creditor repayments overseen by court-appointed trustee Nobuaki Kobayashi.

As Cointelegraph reported, the bull market was also reflected in exchange-traded products, with BlackRock noting that its Bitcoin and Ether iShares funds contributed positively to quarterly earnings, driven by strong investor inflows and fee income.

That includes analyst Pat, who predicted a “generational bottom” for Bitcoin, citing its performance relative to gold over the past four years.
