Comprehensive Guide to okx cry

The alleged mastermind behind a \$14 billion crypto scam, currently on the run from the U.S. government, has begun moving billions of dollars worth of Bitcoin to new wallets, according to on-chain data.

Trading volumes jumped 140% from the previous quarter, fueled by increased spot and derivatives volumes. The quarter included the execution of a major client transaction involving the sale of more than 80,000 Bitcoin (BTC) — one of the largest crypto trades to date.

While some market observers believe that the traditional crypto four-year cycle is about to be broken, analysts told Decrypt this week that they believe some traders

are still following the classic rulebook—and selling due to the expectation of falling prices ahead.

“DeFi adoption patterns reveal an even more dramatic shift,” Chainalysis said, referring to Russia’s DeFi activity surging eight times its previous levels in early 2025.

“Aussie culture and sense of humour may play into our propensity to engage with meme coin offerings just as much as potential gains. Many see these tokens as a low-stakes way to engage with crypto communities and trends,” he said.

At 77, BNB’s RSI is one strong week from breaching 80, where corrections typically trigger. The parabolic structure itself is inherently fragile—if BNB breaks below its rising support line even briefly, it could cascade into a 20-30% correction as stop-losses trigger and profit-takers flood exits.
